Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. In view of the appeal brief filed on 8/10/201, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

- (a) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,
- (b) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

2. The abstract of the disclosure is objected to because the word "said" should not be used in the abstract. Correction is required. See MPEP § 608.01(b).

3. Claims 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kralik et al. in view of Isackson (5,659,143) and Zadek (2,364,581).

Kralik et al. disclose a maraca as stated in the office action of 7/19/2000. The difference between Kralik et al.'s maraca and claims 13 and 14 is that the claims recite using the maraca as an ornament for a key chain, said handle is fabricated of flexible material permitting resilient bending of said handle, said ornament having the overall shape of a miniature maraca having an overall

Art Unit: 2837

length corresponding to the approximate width of a person's hand, and a bore sized for receiving a key ring or key chain member and is formed in the distal end of the handle of the maraca.

Isackson teaches using the maraca as an ornament for a key chain, and a bore is formed in the distal end of the handle of the maraca for receiving a key chain (col. 3, last line, and col. 4, lines 1-4, and "carried in a pocket or a purse" obviously means the size of said ornament having an overall length corresponding to the approximate width of a person's hand). Zadek teaches a rattle handle (18) made of flexible material (col. 2, line 10, and a flexible handle is obviously permitting resilient bending of said handle). It would have been obvious to a person having ordinary skill in the art to modify Kralik et al's ornament as taught by Isackson and Zadek to include the maraca as an ornament for a key chain with a handle fabricated of flexible material, and a bore is formed in the distal end of the handle of the maraca for the purpose of receiving a key chain.
